About This Game

Delete is a minimalist puzzle leisure game.it is inspired by Minesweeper. It inherits all the excellent features of the original work, and has increased its spatial dimensions.

Your goal is to turn over all the squares, figures show the number of unknown red squares around them, you need to deduce all the answers by being reminded of by the figures

There is no time or star limit in the game, you are supposed to enjoy the relaxing experience.

Like my works before, it will keep introducing new ways of playing, the difficulty will progressively increase.

FEATURES

- The design of 50 levels with different shapes
- 7 different ways of playing and combination
- All riddles can be reasoned
- Simple and pure artistic style and ways of the game
- No language interfaces and content

An excellent little logic puzzle game. If you are a fan of games like Hexcells, this is definitely for you.

Hopefully the developers will come out with a sequel, not necessarily adding new gameplay, but simply just expanding and combining what is already available.. Although it adds many interesting elements to the Minesweeper concept, there are too many levels that force you to make guesses as to where a mine might be, rather than letting you use the information you got on the field.
As a huge Minesweeper fan I was very disappointed to see such promising twists on the formula be wasted by a luck mechanic that had no reason being there.
